1 **2** and **3**

Category: **KG1 - KG2 - KG3**

This exceptional series accompanies students from their first year of kindergarten (KG1) to their last year (KG3).

The age appropriate stories are defined by interesting pictures and followed by comprehension questions to teach the students critical thinking.

Students learn how to identify and decode letters and words through games, stickers, coloring, cutting and pasting among other fun activities.

Acquiring the language can be fun with videos, songs, and poems.

The thematic approach helps students become aware of their environment and everything around them.

Not only do students learn English effectively, but math and science are also part of their education. From numbers to the weather, students learn to interact with the world around them.

Through this series, students become critical thinkers and inquirers.
